

AGRICULTURAL IRRIGATION EQUIPMENT

Many companies do not like to include pivot irrigation systems on the inland marine of a farm policy. We have a specialty program that will write these as a monoline inland marine/equipment policy through Chubb.

FEATURES & BENEFITS

Scheduled irrigation equipment and its components are considered a system; supporting equipment does not need to be individually listed

Valuation is replacement cost; actual cash value and stated value options are available

No age restriction for replacement cost or mechanical breakdown

Several per-occurrence deductible options available

Blanket loss payee included

This program offers the insurance solutions and services your farm clients need to protect their equipment against damages caused by weather-related catastrophes, mechanical breakdown, and so much more—so they can keep their operation running smoothly.

POLICY HIGHLIGHTS

- Newly acquired equipment (180 days)
- Inventory or appraisals
- Pollutant cleanup (annual aggregate)
- Leased, rented or borrowed equipment from others
- Fire protection equipment refill
- Fire department service charges
- Debris removal available

TARGET EQUIPMENT

- Pivot irrigation systems
- Drip irrigation systems
- Flood irrigation systems
- Linear irrigation systems
