# HEALTHCARE & HUMAN SERVICES

Our experienced Healthcare & Human Services brokers understand the risks and exposures providers face today. We are familiar with regulatory changes, models of care, contractual obligations, and how these ever-changing trends affect the marketplace.

## HEALTHCARE

Healthcare\* refers to medical services provided by individual medical professionals and facilities. These services can range from elective to emergent medical care.

## HUMAN SERVICES

Human services\* encompasses nonprofit, for profit, and governmental entities with the objective of meeting human needs through prevention, remediation, and maintaining a commitment to improving the overall quality of life for all of society.

## LIFE SCIENCES

Life sciences\* organizations are those that research, develop, and implement products and pharmaceuticals for disease prevention, treatment, and cures, as well as aides to daily life.
